

Coronation Day Addresses Strike An Inspiring Note of Canada's Loyalty - Patriotism

Ideals and Traditions of Democracy and Its Responsibilities and Struggles for Parliamentary Representation and Abolition of "The Divine Right of Kings" Basis of Addresses by Rev. A. S. Partington and Mr. George Kellock.

Addressing the largest assembly ever gathered in Coleman on Coronation Day, Rev. A. S. Partington and Mr. George Kellock gave two fine addresses which were not permitted of publication in last week's Journal.

In part, Mr. Partington's address was as follows:

"Then Samuel took the horn of oil and anointed him in the midst of his brethren, and the spirit of the Lord came upon David from that day forward."—1 Samuel, xvi, 13.

In this passage, the parallel incident in modern times, when George, Duke of York, is called from among his brethren to assume the mantle of his Kingdom—not perhaps the most brilliant of his brethren—but a man of God, chosen of God, "by the grace of God," the Lord said, "This is he, arise, anoint him."

So, today, we have gathered here to celebrate the anointing, the hallowing, years and vibrant with memories of the setting apart of Britain's King, our King, the descendant of David, and King of Israel, chosen from among his brethren, to rule over the greatest Empire the world has ever known.

I do not propose to speak many minutes. The times in which we live, the present hour demands, not speaking, but Thinking and Praying.

I do not propose to speak of the Coronation itself, except that it is essentially a religious, a spiritual rite, the most ancient and the most significant rite in British history. It dates back to the kings of Israel, our ancestors. The stone upon which our King was crowned was that used in similar sacred uses for the kings of Israel.

But, rather am I going to speak briefly of the implications, the responsibilities, the privileges of citizenship which fall, not only upon the shoulders of our King today, but upon every citizen of this vast Commonwealth.

We live in troublous times, fraught with anxiety, not only for the safety of our great Commonwealth and Dominion, but for peace of the world.

On our proper understanding of the

Elks Present Flags to Girl Guides

The following is a copy of the address on the printed scrolls which accompanied the flag presentation on Coronation Day:

To: First Coleman Ranger Company: By the Benevolent and Protective Order of Elks, Coleman Lodge No. 117.

Mr. Chairman and all loyal organizations gathered here on this historic occasion, it is my honor to represent the Protective and Benevolent Order of Elks of Canada, a service organization whose constitution is founded on the principles of national character.

The flags you see at my side are our National Emblems. The red, white and blue colors stand for love, purity and truth. It is one of the commandments of this order to impress upon your minds that freedom justice and equality are assured under its protection.

It is my duty to inculcate and foster in your hearts an abiding loyalty to our great Empire. These emblems command your honor and respect, and from this create a spirit of charity, justice, brotherly love and fidelity.

It is the sincere hope of this order that these virtues will guide you in your efforts to form a solid foundation for Canadian loyalty as British subjects.

On behalf of the Coleman Lodge No. 117, I now invest these colors in your care.

May God bless you and help you.

"GOD SAVE THE KING"

Mac Supper, Frank Barrington, Exalted Ruler, Past Exalted Ruler.

DRAW FOR CORONATION CAKE

Watch for particulars of the Coronation cake to be drawn for on Dominion Day. Proceeds for the Girl Guides of Coleman. It was donated by Hunter's Bakery, Coleman, and is the finest cake ever made up in this town. It is on view in Economy Meat Market window. The tickets, which will shortly be on sale through the Pass, are ten cents each.

Graduating from Alberta University with bachelor of arts degrees recently were Hugh Alexander Ferguson, Joseph E. Morgan and Miss Gertrude E. Thompson, of Blairmore, and Father Goodwin, of Bellevue. Also, recommended for diplomas: Robert A. Cruickshank, Hillcrest, and Miss Irene James, Coleman.—Blairmore Enterprise.

Salvationists 22nd Anniversary Is Joyous Occasion

Major Acton, Coleman's First Officer, Recalls His Experiences in The Pass.

The 22nd anniversary services of the Salvation Army were featured by a special service over the week-end with a band festival and concert in the community hall on Monday evening, at which Major J. Acton, divisional commander for Alberta, and the first officer of the Army who established the local corps in Coleman in 1915, was the principal speaker.

Jellevue band, under Mr. George Goodwin, gave a very fine program for which they were highly commended. The overtures and marches were of a high standard. Mrs. R. Upton, of Bellevue, sang two numbers, and was ably accompanied on the piano by Mr. T. Blower. Cornet solos by Captain Halsey, of Macleod, and a song by Mr. W. Goodwin rounded out the musical part of the program, also a clarinet duet by Frank Hosk and Harry Patterson.

Major Patterson was chairman, and complimented the Army for its world-wide humanitarian work and also the local officers, Lieutenants Pitch and Frayn, who had been very energetic during their stay here, stating that apart from attending to their own needs, they have always tried, both on the street and in the hall, to point out the way of Salvation to all.

"I am sure," he stated, "that the Crow's Nest Pass is a better place in which to live because of the work of the Salvation Army."

Major Acton in humorous vein related some of his experiences during the early days of the Army's career in the Pass. Arriving here at 8:30 a.m. on the train one morning in 1915, the first people they spoke to replied "Me no savvy." However, people soon realized they had come to give a helping hand, and he looked back with many pleasant recollections to his work here, and trusted that under God's guidance the good influence of the Army would continue among the people of the Pass towns. He complimented the band on their fine performance, and stated it was the playing of Salvation Army band in Winnipeg which first attracted him to the Army, having joined in Winnipeg.

At the week-end service, which had helped in the program, who were given a hearty round of applause.

A message was read, which will be of interest to the older residents of the Pass towns. It is as follows:

Halifax, N.S.,
March 24, 1937.

To the Comrades of Coleman Corps:

It seems incredible that over twenty years have passed since I found myself, with Captain Joe Acton, stationed at Coleman. Had it not been for

First Aid Competitions Here on Victoria Day

Competitions at Sports Field Commence 8 a.m.; Presentation Prizes in Evening at Grand Union Hotel.

Eleven senior and five junior teams will compete in First Aid competitions here on May 24, as follows: Cammore, Hillcrest (2 teams), Mohawk, Bellevue, Blairmore (2 teams), McGilivray, International, Coleman, St. John's Ambulance, Coleman High School. All junior teams from Coleman. The competitions will be held on the sports field, weather permitting, commencing as early after 8 a.m. as possible, and in the rink if weather is unsuitable for outdoors. A smoker will be held in the evening in the Grand Union hotel, at which presentation of prizes will be made. These will be on view in Rushton's store.

The judges will include E. H. Starr, Calgary; Alex. Henderson, Calgary; Mr. Grundy, of Michel, and Mr. Puckey, of Fernie.

Among the local district girls recommended to the University of Alberta Senate for registered nurses' diplomas were the following: Miss Jessie McMurdo, Pincher Creek; Miss S. Casagrande, Hillcrest; Miss K. A. Ondras and Miss M. Robert, Coleman.

MOTHERS' DAY AT UNITED CHURCH—FLOWERS PRESENTED

The Mothers' Day service of the United church Sunday school was held on Sunday morning. This service has for a number of years been one of the events of the year. According to custom, the school and the adult congregation met together.

Seats were at a premium even after the chairs from the clubroom had been added to the regular accommodation. A special order of services was used. The junior choir sang two selections and a group of small boys sang a song.

Beautiful tulips were used in the decoration of the communion table and pulpit, provided by the Sunday school and the C.G.I.T. These with the addition of flowering plants added much to the atmosphere of the service.

Every mother present was presented with a flower by the youngest of their children present. During the service four children were baptized. The occasion was a very happy one.

The services will be at the usual hours next Sunday. Members and friends are asked to make an effort to attend the morning services, even though at this time of the year there are many other attractive things to do.

Harry Parkinson, injured some time ago at International mine, was taken to Calgary this week and placed under the X-ray. He was found to have a cracked vertebrae and has been placed in a plaster cast for three months.

Preservation Of Democracy

In these days of international strife and internal controversy, with protagonists of Fascism and Communism in the saddle in some countries and advocates of these and other aims striving to get the upper hand in other realms, the people of Western Canada have every reason to be thankful that they are citizens of a country where democracy reigns—a country in which the people themselves have the right to say what they want and in which the precious privileges of free speech and a free press still prevail.

Fears are frequently being expressed, however, that democratic countries are in danger of being overwhelmed by the fighting forces of dictatorships and that democracy is in peril of extinction. No doubt, there have been some grounds for such fear, but to-day the greatest danger to self-government comes from within rather than without.

It can be taken for granted that the great bulk of the people of this country are not prepared to surrender their liberties to any form of dictatorship, whether group or individual. The rights of free speech and freedom of action are cherished and there are few who would relinquish them in favor of benefits, imaginary or real, which would result from abandonment of the self-government privilege.

But if these rights and privileges are to be conserved, it is essential that the standard of education of the people be high and that they be of strong moral fibre, for in a democracy it is a sine qua non that the leaders of government must possess these attributes in high degree and it is also a fact that in these respects the leaders cannot be far in advance of the electorate who give them their authority or they will not be in office very long. So that in the final analysis the type of government that the people of a democracy get depends upon themselves and is no higher than they deserve. Hence, the importance of an enlightened, intelligent and unselfish electorate if democracy is to be preserved in an age of conflict between principles and desires.

This thought is very ably expressed by James Truslow Adams in the New York Times Magazine as summarized by the Reader's Digest in the following words:

"Just as a despot may be benevolent or cruel, so a people which governs may be educated, wise, public spirited or the reverse" and, amplifying this idea:

"Both democracy and the vision of a very high standard of material living for all are new. Man is by nature selfish. He looks first to the good of himself, his family and his group or class, rather than to that of all. Pressure groups arise. If such groups learn, as they have done, to use the machinery of democratic government more rapidly than they develop the social and moral spirit, that can alone sustain democracy, it is far from unlikely that they may destroy the finances of the State, pull down the entire structure, and in the resulting chaos and distress be willing to give up the dangerous and difficult adventure of self-government to any man who will promise a false security."

"There is also the race, which may be lost, between education and the increasingly complex demands on government. Few, if any, are the citizens, with their own affairs to look after, who can hold really competent opinions on such diverse topics as, say, money, price regulation, labor, agriculture, foreign affairs. In so far as the democratic process tends to make rubber stamps of its representatives and to play on their fears for favors demanded, it will tend to make costly and perhaps fatal mistakes."

After expounding the theory that democratic government is more inefficient than a dictatorship, Mr. Adams goes on to say:

"On the other hand, the condition—material and spiritual—of the peoples to-day under a Mussolini, a Hitler or a Stalin does not indicate that the wisdom of one person better conditions for all than the folly of the many. In what totalitarian State," he asks, "are the all-round conditions for a contented, wholesome, free and full life better than they are in the Scandinavian countries, the British Empire and the United States?"

"There are, however, these and other insidious mental and moral problems for democracies as for individuals. A man who does not bother to educate himself, who wastes his money regardless of the consequences to others, who declines to work if he can be supported by somebody else, who thinks he has a right to all he wants, who thinks only of claims and not of duties, and so on, is not likely to be a success. Neither is a democracy made up of such."

Food Prices Climbing

Bureau Of Statistics Reports Increase In Living Costs

The cost of living is climbing. The general index of the cost of living for Canada, computed by the Dominion bureau of statistics, was \$22 in April as compared with \$20 in March.

The retail price index of foods rose from 75.7 in March to 76.3 in April. Considerable gains were reported for a wide range of foods, including butter, lard, flour, bread, sugar, tea, codfish and several meats, although moderate decreases occurred for eggs, corn, potatoes, margarine, jam and coffee. There were no changes of any importance recorded for other budgetary groups.

The cathedral at Toledo, Spain, has a sacral shrine 12 feet high embellished with 260 statues of solid gold. The largest of these was made from the gold which Columbus took to Spain after his first voyage of discovery.

The common house spider has six spinnerets, each of which is covered with tiny spinning spools, and out of these come jets of liquid silk, hardening instantaneously on exposure to air.

"Empress," an Indian elephant, served on both sides during the Civil War. Both the South and the north used her for hauling supplies at Nashville, Tenn.

Had To Be Right

But Affixing Name To Sales Slip Took Some Time

A gentleman had completed his purchases and the clerk, in filling out the sales slip asked:

"What is the name, please?"

"Jepson," replied our hero.

"Jepson?"

"No, Jepson. Sixteen twenty-one West."

"Your first initial, please."

"Oh, K."

"O. K. Jepson."

"Excuse me, it isn't O.K. You didn't understand me; I said 'Oh'."

"O. Jepson."

"No. Rub out the O, and let the K stand."

The clerk began to look haggard.

"Will you please give me your initials again?"

"I said K."

"A sacral, you said O. K."

"I said 'Oh'."

"Just now you said K."

"Allow me to finish. I said 'Oh' because I didn't understand what you were asking me. I didn't mean it was my initial. My name is Kirby Jepson."

"No. Not O, but K. Here, give me the pencil and I'll write it myself. There, I guess it's O.K. now."—Annapolis Log.

By actual test, handwriting in pencil requires nearly five times as much light to be legible as writing in ink.

Farm Machinery Business

Staging A Comeback In Western Canada After Many Years

After seven lean years, the farm implement business is picking up in Western Canada.

The prairie farmer is once again in the market and making long-overdue replacement of farm machinery. Every implement company officials at Winnipeg said.

One major company reported 50 per cent. increase in sales in the first four months of this year compared with the same period last year. Other companies also reported considerable increases.

Prevailing high prices for wheat and optimistic crop conditions in Manitoba and parts of Saskatchewan and Alberta have led to the buying wave, it was stated.

The implement business has been in a slump since 1929 and for the past seven years farmers' demand for farm machinery in Western Canada has dwindled in face of poor grain prices, drought and general economic instability.

Special Type Of Glasses

Enable Wearer To Read Comfortably When Lying Down

"Recurrent spectacles"—glasses for invalids and others who have to lie more or less flat on their backs and who wish to read—were shown to the public for the first time at the British Industries Fair. These spectacles enable the wearer to see more or less at right angles to the ordinary line of sight. They contain a pair of prisms, which project incoming rays of light in such a way that the wearer can read a book held comfortably at arm's length, resting on the waist—in a position where it could not be read at all, ordinarily, without raising the head from the pillow. Corrective lenses for righting defects of eyesight in the usual way can be combined with the two prisms.—Science Service.

One Of Britain's Heaviest

Man Twenty-Four Years Old Weighs 448 Pounds

When Herbert Savage, of Rochester, England, who weighs 448 pounds, fell and broke his ankle, six men sent from the hospital had a hard time lifting him into an ambulance. At the hospital he was given for his first meal a boiled egg and two slices of bread and butter, the regular diet. His girth is nearly 80 inches. He wears a collar about two feet in length. For his age, 24, he is one of the heaviest men in Great Britain. Last year Richard Harrow, who weighed 560 pounds and was known as "the quarter-ton man" died at Southend.

New Organ In Abbey

Installed At Cost Of Around Hundred Thousand Dollars

Radio fans who listened to the broadcast of the coronation of King George and Queen Elizabeth, May 12, enjoyed a much better musical program than the actual participants did at the time of King George V's coronation in 1911. Installation of a new hundred thousand dollar organ in the Abbey enabled the authorities to draw up a much more comprehensive musical program than at the last coronation.

The old Abbey organ, built 206 years, completely collapsed early last year.

Moon farming, the planting of seeds in accordance with certain phases of the moon, has absolutely no support from any scientific point of view, according to a report of the U.S. Department of Agriculture.

New Scientific Finds

Were Discussed At Annual Meeting Of Virginia Academy

A new type of high speed rotor which spins freely in space, Dr. Fred T. Holmes of the University of Virginia said, may provide a new tool for medical research and studies of such fundamental things as the speed of light.

Addressing the annual meeting at Charlottesville of the Virginia Academy of Science, he described how for the first time it is possible to suspend the tiny top between two magnets which just overcome the pull of gravity.

Chemical houses made largely of the new products of organic chemistry were predicted by Dr. G. C. Curme, vice-president and director of research of the Carbide and Carbon Chemicals Corporation.

At present, Dr. F. B. Jewett, president of the Bell Telephone Laboratories, explained, the telephone voice has had to pass over an actual, physical circuit, that is, a pair of wires.

"Recently," however, he said, "thanks to the research laboratory, operating in a myriad of fields, an entirely different method of providing large numbers of channels has been achieved and the way opened to an unknown indefinite extension."

Lady Shaughnessy Dies

Was Widow Of One Of The Founders Of The Canadian Pacific Railway

Dowager Lady Shaughnessy, widow of Rt. Hon. Lord Thomas George Shaughnessy, one of the founders of the Canadian Pacific Railway Company, died in Montreal after a brief illness. She was in her 85th year.

Lady Shaughnessy, whose husband died in December, 1923, had been ill only four days. A daughter of N. Nagle, of Milwaukee, Wis., she was married in 1880 to the Irish railway pioneer who received a knighthood from King Edward in 1901.

For many years Lady Shaughnessy was active in social and charitable work, but since her husband's death had lived in retirement at her big Pelee street residence.

Survivors included a son, Lord Shaughnessy, visiting in London with his daughter, and two daughters, the Hon. Marguerite Shaughnessy and Hon. Mrs. R. M. Redmond.

SELECTED RECIPES

CHOCOLATE SOUFFLE

Temperature: 325 degrees F.

Time: 45 minutes.

2 squares unsweetened chocolate

1/4 cup sugar

3 eggs

2 tablespoons butter

1 tablespoon Benson's Corn Starch

1/2 cup milk

1/4 teaspoon vanilla

Method: Melt chocolate in top of double boiler; add 1/4 cup sugar and beaten egg yolks. Stir and cook until smooth. Melt butter; blend in Benson's Corn Starch and let bubble 2 or 3 minutes. Add cold milk; stir and cook until sauce is smooth. Combine two mixtures and let stand until at room temperature. Stir in the egg whites adding reserved 1/4 cup sugar. Fold into the chocolate mixture. Add vanilla. Sift Benson's Corn Starch over the bottom of an ungreased casserole; pour in soufflé mixture. Bake in slow oven until light and delicately browned. Serve at once with "Crown Brand" sauce.

According To Leopard Law

Three new-born leopard cubs were killed by their mother in Lincoln Park Zoo, Chicago. Attendants attributed the infanticide to an inexorable law of leopards—never to let their young be reared in captivity.

WITH FRANCO'S VOLUNTEERS ON THE BASQUE FRONT

This photograph shows Franco's forces in Ochandiano after they had captured the town and wrecked the buildings. Note the armored cars on the left.

HIS RHEUMATISM LEFT HIM

Sufferer Follows Good Advice—and Takes Kruschen

The writer of the following letter had a bad attack of rheumatism, and was advised to take Kruschen. He did so, and describes his experience in the following words:—

"About two years ago I developed a severe attack of rheumatism in my left shoulder blade. I tried all sorts of remedies, but with no results, until one day my brother-in-law, on hearing of my suffering, exclaimed, 'There is only one thing for rheumatism! That is—Kruschen Salts!' I decided to purchase a bottle, and for the first week took a teaspoonful in a glass of hot water each morning. The pain gradually disappeared and has now gone entirely. I am still taking my early morning dose, as I feel convinced that it is helping to keep me fit."—J.G.B.

Rheumatic conditions are frequently the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts are notable for their work in dissolving uric acid. Other ingredients of these Salts assist Nature to expel the dissolved acid from the system.

Interested in the use of pure variety seed will receive a hearty welcome to the University.

The entertainment part of the program will include visits to points of interest in the neighborhood of Saskatoon, and the farms of certain seed

growers nearby. It is expected that automobile trips will be made to the Dominion Experimental Station at Rothemann and to the farm of James Rugg of Estatoz that will have special interest for farmers, and a holiday trip to Lake Manitoba at Watrous is also being planned for June 26th. Ladies can participate in all the events and a special program is also being arranged for them.

Mr. F. W. Townley-Smith, Lashburn, Sask., is the president of the Canadian Seed Growers' Association; Mr. F. L. Dickinson of the United Grain Growers Limited, Winnipeg, Man., is the vice-president; and Mr. W. T. G. Wiener, Ottawa, Ont., is secretary-treasurer. The head offices of the association are located at Ottawa, Ont.

For any information concerning the meeting, write to S. H. Vigor, Secretary, Sask. Branch, Canadian Seed Growers' Association, Room 146, Parliament Buildings, Regina, Sask.

W. T. G. WIENER Secretary-Treasurer

Change Of Work

High officials of the German propaganda ministry changed pens for pencils and spades to break rocks. A decree ordered those who have spent their time signing state documents to lend a hand to road workers for two months or work as coal trimmers and hod carriers and live on wages paid such laborers.

Crests and mottoes technically are battle symbols and war relics.

Well-cured ham usually is best when it is one year old.

Zinc Added To Insulin

Tends To Slow Down Its Action In Body

Sir Frederick Banting of the University of Toronto, discoverer of insulin as a remedy for diabetes, told scientists at Pittsburgh, for dedication of Mellon Institute's new building, that zinc is being added to insulin to slow down its action.

Sir Frederick explained pure insulin is too quickly absorbed by the body, necessitating in some cases, several doses daily.

The zinc treatment, he said, slows the action, but added:

"It is too early to speak of the clinical value of this form of insulin."

Asked if he could vision a world free of disease, Sir Frederick replied:

"Free of infectious diseases, yes. But as we conquer them new diseases of an organic nature come to light. Heart trouble, for instance, and many others brought on by our complex civilization."

Has New Surfaces

A road recently laid in Birmingham, England, cost approximately \$25,000. The road is only two-thirds of a mile long and has in it materials ranging from cast iron, wood, and rubber, to concrete with cork-filled joints. The road has 32 different surfaces.

"You never take the slightest interest in anything I do," sobbed the young bride.

"Now don't be unreasonable darling," said the new husband. "All last night I lay awake wondering what you had put in that cake you made yesterday."

The Franciscan monks own the garden of Gethsemane.

See Great Promise Of Imperial Influence On World Affairs

London. — Commenting on the speeches at the opening of the imperial conference, the press singled out for most attention the proposal of Prime Minister Joseph Lyons of Australia for a Pacific non-aggression pact.

"Particular attention will be devoted to certain remarks by Premier Lyons," the Morning Post said, "which were unusually explicit for a ceremonial occasion. The conception of a unified foreign policy is something new in inter-imperial relations but Lyons went further and spoke of a Pacific pact of non-aggression."

"These statements show how far imperial statesmanship at the present conference has advanced beyond the previous habit in these conferences of confining discussion almost exclusively to matters of purely inter-imperial and domestic concern. It is a departure which deserves a most cordial welcome and it carries with it a promise of great enhancement of imperial influence on world affairs."

"MacKenzie King of Canada spoke

A Great Broadcast

Millions Listen In To Recital Of Coronation By Britain's King And Queen

New York. — The air recital of the coronation of Great Britain's king and queen was a great broadcast. Just how many listened in the world at large no one can say. Hundreds of millions is a conservative estimate. The possible North American audience was figured at 85,000,000.

As the experts had forecast, Trans-Atlantic reception approached the ideal, conditions making clearly audible everything that went on in Westminster Abbey and the description of the processions.

On the Pacific coast, where the time was 1 a.m., when London "started up" stations just kept right on broadcasting from Tuesday into Wednesday.

In the middle west, half-way between midnight and dawn all-night restaurants in Chicago were filled with listeners.

In New York taxi-cabs parked along Broadway and other downtown streets each had its own cluster of sidewalk guests to hear what its auto receiver was reproducing.

Something like 270 stations in the United States were hooked on the three main networks, which obtained their signals by short wave after they had been originated by the British Broadcasting Corporation.

It was rated as the most extensive hookup ever attempted in broadcasting, numerous other countries besides the United States and Canada relaying the program.

Also, the program was the longest on record, approximately six hours with little or no interruption.

Counts Another Victory

Airman In North Lands Plane On Broken Ski

The Pas, Man. — Airman counted another victory over the Canadian northland as they praised Pilot E. W. (Ted) Stull of Winnipeg for his skilful landing of his plane with one ski damaged, on ice of Moosene Lake, 200 miles south of Churchill on the Hudson Bay railroad.

The ski was shattered as Stull took off from Churchill with four passengers, bound for The Pas in northwest Manitoba.

He set the plane down safely on the little lake near Hford, at Mile 286 on the Hudson Bay railroad. Passengers were uninjured. Stull arranged for their transportation to The Pas by rail and will continue the fight himself when the damaged ski was repaired.

B.C. Elections

Many Parties In Field For Provincial Contest On June 1

Vancouver. — British Columbia electors will select the 48 members of the 19th legislative assembly from 187 candidates when they go to the polls June 1.

When official nominations closed the Liberals, led by Premier T. D. Pattullo, had a full slate of 48 in the field. Co-operative Commonwealth Federation, 45; Conservatives, 43; Social Credit League, 18; B.C. Constructives, 14 and 19 candidates were entered under other banners.

The latter group includes representatives of Independent, Labor, Social Finance, Financial Justice, Communist, Socialist, and other political factions. Fourteen women are candidates.

COLONIAL TROOPS MARCH THROUGH LONDON

HIS MAJESTY KING GEORGE VI

Beacon To Mankind

British Commonwealth The Largest League Of Peace

Capetown. In a world "troubled by a spirit of revolt from the past, menace of personal liberties and scrapping of parliamentary government," the British Empire stood as a beacon light to mankind, said General Jan Smuts at a coronation day gathering.

The Commonwealth of British nations was the largest peaceful unit that ever existed, the minister of justice and acting prime minister of South Africa, declared.

"We have one-fourth of the world and probably one-fifth of mankind living in relations of undisturbed peace with each other," he said.

"Here is a real peaceful league of nations, here is world-wide friendship, here is safety from war dangers."

"Surely it is a matter of immense value to us that we are members of this great peaceful circle."

The confusion of the abdication had presented a golden opportunity for members of the group favoring disruption, he continued, adding:

"The great test came within six months of the passing of the statute of Westminster. In the moment of danger there was spontaneous unanimity throughout the whole world-wide commonwealth. One king went with the deepest regrets and sympathies and a tragic sense of loss from the millions who know and admired him. Another king stepped into his place with the unanimous acclaim of the whole commonwealth."

"We are to-day consummating this triumph of the spirit of unity and loyalty by crowning him our common king. A new chapter has thus been written in the constitutional development of mankind. Here for the first time we have a king of kingdoms spread over the whole globe."

School Children Entertained

Canadian Students Were Guests Of British Postmaster-General

London. — The 240 students selected from all parts of Canada and Newfoundland to attend the Coronation were guests here of Major George Tyrone, postmaster-general. After inspecting the Mount Pleasant telegraph office they had tea with the postmaster-general, who exchanged telegrams with the governor-general of Canada and the governor of Newfoundland.

Imperial Conference To Consider Questions Of Foreign Policy

London. — The first imperial conference of the new reign adjourned for the Whitstable holidays after passing a motion of loyalty to the throne and hearing the opening declarations of the empire's prime ministers.

Stanley Baldwin called upon the delegates to do what they could towards the "diminution or removal" of the causes of present international unrest; MacKenzie King of Canada, reserving comment on international affairs, said the empire should seek "to lessen in every practicable way the barriers to international trade"; and Joseph Lyons of Australia, demanded the formulation of a "consistent, unified empire policy."

The empire's prime ministers will meet again and a start will be made on consideration of questions of foreign policy and defence. "It will be our task," Baldwin told the delegates, "to examine the causes of the present international unrest, exchange views upon them and consider whether there is any controversy in which we, co-operating together, could make to their diminution or removal."

This view was echoed by MacKenzie King, who recalled that through the past three centuries Britain had given the world an example and challenge in political democracy and individual liberty achieved within its borders. It should be the aim of members of the wider British Commonwealth of Nations, he said, to build upon that foundation and so order their relations and co-ordinate their policies and they in turn might contribute in the peaceful ordering of international relations something of equal value to the common stock of mankind.

Both Baldwin and MacKenzie King paid tribute to the late King George V. Many of those at the conference, Baldwin said, "knew the value of his wise counsel and quiet courage in time of difficulty and stress." The Canadian premier said the late sovereign's essential humanity "brought us all together as members of a great family."

A message of loyal greetings was despatched to King George VI, and a reply, signed by His Majesty's own hand, soon came back, declaring he would follow the deliberations of the conference "in the confident hope that they will advance the happiness and prosperity of all my peoples."

Referring to the coronation, MacKenzie King said "for the first time, in this great ceremony it was recognized that the relationship between the king and his people of Canada is direct and immediate." The oath taken by the king, he said, "embodies in simple fashion our political faith and mirrors the structure of this group of free, equal, autonomous

states known as the British Commonwealth of Nations."

In a brief reference to the Dominion's domestic affairs, the Canadian premier said foremost among the tasks facing the country was a careful study and adjustment of problems arising from differences in the economic situation in the various parts of the Dominion. Problems had been brought to the surface which "may require some readjustment of the financial and constitutional relations between the Dominion and the provinces."

MacKenzie King expressed conviction enduring peace could not be achieved without economic appeasement, that political tension could be lessened without an abatement of policies of economic nationalism and economic imperialism.

"The countries represented here," he said, "have a definite responsibility to join with other countries willing to co-operate in a concerted effort to avoid increasing tariff exchange or quota control and to lessen in every practicable way the barriers to international trade."

Canada already had endeavored to "open up the channels of trade. Negotiations with the United States and the United Kingdom had led to substantial tariff reductions. In no instance were the concessions to either country effected by raising duties against any other country. If this policy were continued, he indicated, it would be a contribution to a revival of trade and the consequent removal of international friction and conflict."

Publisher Is Honored

Vernon News Included In Eleven Best Weekly Newspapers On Continent

Vernon, B.C. — W. S. Harris, publisher of the weekly Vernon News—five times a winner of the title, "best weekly newspaper in Canada"—was honored here at a meeting of Vernon Board of Trade.

Mr. Harris and his staff of 21 members were commended by R. Peters, president of the board, on their showing in a recent listing of community papers by Professor John Casey, dean of journalism at Oklahoma University.

The Vernon News was the only Canadian periodical included in Professor Casey's selection of the 11 best weekly papers on the continent.

Baden-Powell Honored

London. Lord Baden-Powell, chief scout and founder of the Boy Scouts, was honored in the coronation honours' list, receiving the coveted order of merit. The distinction is limited to 24 members.

British Destroyer Is Damaged by Explosion Off the Spanish Coast

Valencia. — The British destroyer Hunter either struck a mine or was hit by a torpedo off Almeria, Spain, the resulting explosion killing at least eight of her crew and injuring 24.

Three bodies had been recovered while all hope was abandoned for five others missing and believed trapped in a flooded part of the ship. With the aid of Spanish government vessels, the Hunter reached port at Almeria.

Information received by the British embassy here suggested the cause of the explosion was outside the ship but further details were lacking. A heavy explosion occurred on the starboard waterline.

The Spanish ministry of air and marine here issued a report from the captain of the Spanish government battleship Jaime I. on the incident. He said he ordered several Spanish warships to go to the Hunter's assistance, including the destroyer Lazaga.

Fourteen members of the Hunter's crew were picked up by a Spanish launch.

Ambulances, nurses and doctors were waiting at the dock at Almeria to aid the wounded, he reported.

Spanish officials, accompanied by British officials, are to inspect the Hunter to determine the cause of the mysterious explosion.

Five of the men killed were

trapped in the engine room, Almeria reported.

London. — The British destroyer Hunter, at least eight of her crew killed and more than a score injured, lay in Almeria harbor while investigation was pressed into the explosion off the coast of civil war torn Spain that all but sank the year-old craft. The admiralty was reticent.

From some sources came reports the vessel struck a mine as she went about her duties as a unit in the European non-intervention committee's patrol of Spanish waters.

But Spanish government sources expressed belief the destroyer had been torpedoed by a Spanish insurgent warcraft. Gibraltar heard reports the damage might have been caused by a bombing plane.

She was in sight of the Spanish coast when the explosion spread death and destruction through the Hunter's bow, possibly touching off a mine.

A despatch to the Havas news agency from Almeria said first hasty examination convinced investigators a torpedo might have passed through the Hunter's bow, possibly touching off an explosion of the Hunter's own torpedoes.

She is equipped with eight 21-inch torpedo tubes in addition to four 4.7 inch guns and seven smaller guns. There was no confirmation in British circles of this theory.

The King's Honors List

Baron Tweedsmuir and Hon. Ernest Lapointe Get Awards

London. — Thirteen peerages, 13 privy councillors, seven baronetcies and almost 100 knights, with columns of promotions and appointments in the various orders, figure in the long list of those whom the king honored on the occasion of his coronation.

Again, among the Dominions, no titles go to Canada, South Africa or the Irish Free State. Lord Tweedsmuir, governor-general, and Ernest Lapointe, Canadian minister of justice, however, are made "right honorable" by appointment to the privy council. The Earl of Bessborough, governor-general of Canada 1930-35, who holds an Irish peerage, is created an earl in the peerage of the United Kingdom.

As never before, perhaps, the coronation honors cut a cross-section of life in the United Kingdom. Members of the royal family, statesmen, businessmen, writers, artists, musicians all appear in the list.

Appointment to the imperial privy council of Lord Tweedsmuir, governor-general of Canada, and Hon. Ernest Lapointe, Dominion minister of justice, provided the only awards in the king's coronation honors list of particular interest to Canada.

Special Ceremony For Visitors

Mounting The King's Guard Will Be Daily Feature

London. — The brilliant military spectacle of mounting the King's Guard from the Horse Guards Parade will be afforded coronation visitors daily for two weeks starting May 18.

More than 500 troops will participate in the ceremony which will last three-quarters of an hour. The troops will be drawn from what are known as the West End battalions of the Guards, two of which are stationed at Chelsea barracks and two at Wellington barracks. They will share the duty in rotation. Each day they will march from the barracks to the parade ground, where they will be drawn up facing the Horse Guards. After the bands have marched, the escort will "troop the color" down the line, first to slow and then quick time.

New York-Paris Derby

Annapolis, Md. — Her studies in aerial navigation completed, Mrs. Amy Johnson Mollison, famous English flyer, has left here with her course plotted out for the New York-Paris derby later this summer. Mrs. Mollison studied navigation under Lieutenant-Commander P. V. H. Weema, U.S.N., retired.

Regional Schemes For Aiding Farms In The Drought Areas of West

Ottawa. — Within a month it is hoped the first of a number of regional schemes for improving farming conditions in the western drought area will be under way. Hon. J. G. Gardiner, minister of agriculture, stated here.

Highly pleased with the results of the recent Regina conference on drought rehabilitation, Mr. Gardiner returned to his office after a three weeks' visit to the west. He said most of the seeding was completed and 75 per cent. of the crop was sown under favorable moisture and soil conditions.

Crop prospects, so far as they can be judged by conditions at seeding time, were particularly good in Alberta, Manitoba, and in the eastern, northern and central districts of Saskatchewan. A belt along the southern boundary of Saskatchewan was dry and badly in need of rain. At the Regina conference, 56 delegates were present, representing federal and provincial governments, municipalities, mortgage and loan companies, railways, land companies and banks. All expressed approval of the plans suggested by Mr. Gardiner, on behalf of the federal department of agriculture and promised co-operation.

An "advisory executive committee" under the Prairie Farm Rehabilitation Act was set up on which the federal and provincial governments and the municipal associations are represented. Provision was made for an "advisory committee," which will be composed of representatives of the land, mortgage and loan companies, banks and railways which may be interested in particular areas.

Through the prairie farm rehabili-

tation organization in Regina, full records have been compiled of land ownership, climatic and soil conditions and other relevant data in the typical Saskatchewan dry districts.

The Alberta government, through its lands utilization set-up, has similar records covering an area in that province.

Information relating to these areas was laid before the conference and discussed in the light of the proposals made by the federal department.

These include rehabilitation based on small irrigation projects and access to water supplies generally and rehabilitation based on the setting up of community pastures under government control in sub-marginal land areas.

All organizations interested in the four areas were represented at the conference and all expressed a desire to co-operate in working out a solution for the problems associated with drought.

Preparations are now under way and expected to bear fruit in a month in the establishment of a small scheme which will be typical of the results the government hopes to achieve. A community pasture will be set up through the acquisition of land unsuitable for crop production but convenient to farms with reasonably good land. These lands will be seeded to grass and water holes for livestock will be provided.

Under government supervision nearby farmers will have the privilege of pasturing their stock on them in the expectation they will be able to produce enough feed on their own farms even in dry years to carry the stock over the winter. 2203

NOTES AND COMMENTS

A VISIT to the Capital is interesting, enabling one to obtain a close-up view of opinion on provincial affairs. Apparently, if one can take seriously the general remarks heard in the course of casual conversation, respect for Mr. Aberhart is at a decidedly low ebb. His Prophetic Bible broadcasts are being accepted at their face value as purely political broadcasts, and some of his more rabid critics charge him with hypocrisy, Hitlerism and an "immoral" attitude in his handling of government affairs.

THE BELIEF so often heard expressed that "Mr. Aberhart is a good man, he will give us honest government if he does nothing else," has been almost completely shattered. The cities are quicker to react and opinions change more quickly than in the rural areas, consequently the turn of the tide throughout the province is not so rapid as one might infer from opinions expressed in Edmonton and Calgary.

A GENERAL "bust-up" is looked for when the legislature meets in June. But the conundrum many are asking is what steps are being taken to choose a new leader who has the ability to inspire sufficient confidence to rally support to elect a new administrative group? The cities are apparently as much at sea on this point as the country. There appears to be a general trend towards uniting all forces opposed to the present government because of its lack of initiative and record of failure to do what it so glibly promised. Out of the Liberal gathering to be held in Calgary there may be some indication of accomplishing this. It is generally recognised that we will accomplish very little in the public interest if time and energy is consumed in mere political party battles.

A MOST pleasing feature of our visit was that of being present at the twenty-seventh annual convocation of the University. It was inspiring to see over four hundred young men and women graduated. Frequently the thought was expressed—"what will they do?" That depends largely on the individual attitude. Equipped with the advantages of university training, these graduates undoubtedly should find in the province and in other parts of Canada scope for the exercise of their knowledge and ability. Just because they possess these advantages in education, is no guarantee that jobs will be handed to them. They too must fight their way towards attaining success in their respective spheres of action. University courses do not complete one's education; life itself is an exacting teacher bringing new experiences. Wise University professors admit that they too must keep on gaining knowledge to retain their ability to impart knowledge to students.

A PLEASING feminine voice over the telephone called up this office to ask what could be done towards introducing the teaching of physical culture in the schools of the Pass towns. The lady felt that it would serve a more useful purpose than some of the subjects at present taught. She had tried to persuade some of the members of the school trustees association to bring it before that august body but her efforts so far had come to naught. She feared they were far too indifferent, and wondered if interest could be aroused among the parents to press the matter. She had read some comment which appeared recently in The Journal on the subject, and thought we might carry the campaign further.

NOW The Journal is always ready to give expression to public opinion on any worth-while subject, but as we have on occasion been accused of "butting in" where angels fear to tread, as it were, we do not propose to offer any suggestions to the trustees, for fear they will reply that the curriculum specifies this and that, and that's all there is to it.

HOWEVER, the point we wish to make is that someone is sufficiently interested to give expression to their views, and if there are others of similar opinion, then it should be made known. We have remarked that so many boys just naturally find their pants pockets the most convenient place to thrust their hands; (possibly it is a habit developed owing to the cold winter climate) and their deportment needs improvement, even for the sake of mere appearance. An upright body, medical men often state, will avert many ills, so that if physical culture will straighten curved backbones and drooping shoulders, and push a forward loping head in alignment with the spinal column, then we are all for physical culture. The lady having brought the matter into the open, perhaps more serious consideration may be given to the suggestion.

WORDS were made for man, and if you must use them, use them correctly. Beware the tyranny of words. So stated President Sherwood Fox of the University of Western Ontario, when speaking in Edmonton recently. At least one person in the capital should take heed.

**Thanks for
Kind Words**

The popularity of the Coronation cover of The Journal issue of May 6 was forcibly demonstrated by the large number of extra copies purchased from the places where they were on sale, as well as this office. Most stores used the front page as the centre piece of their decorative window displays, the fine colored photo of the king and queen lending itself most appropriately for that purpose. It was also noticed on some of the floats and decorated cars in the parade. It made The Journal staff feel that the added expense was well worth while. Many subscribers from far and near sent us complimentary messages which we appreciate.

Oil At Lundbreck

A. M. Densmore, secretary of Inland Petroleum Limited, brought in a sample of oil from the Weymarn well a few miles north of Lundbreck which has a good appearance and was obtained at a depth of 4,600 feet. The well has been drilled to 5,900 feet. The sample is similar to Pennsylvania crude oil, light green in color, and with a strong smell like paraffin oil.

LOCAL NEWS

Mr. and Mrs. E. M. P. Carver were Edmonton visitors during the week, at the home of Mr. Carver's parents.

Norma Plante was graduated from the Royal Jubilee in Victoria on May 6, having completed her three years as a nurse-in-training. She will remain there for the present, having some time to make up.

The College Gospel Team from the Western Baptist College, Calgary, has been holding services each night, and their sweet singing of well-known hymns has attracted favorable comment. They will be here till May 23, services being held in the Knights of Pythias hall.

Another shack town is fast developing at Crows Nest Lake. At one time it was talked of as being set aside for provincial park purposes. It is a pity more supervision in building has not been exercised. What should have been kept as a beauty spot and picnic ground is becoming just another "dump."

Frank G. Creeggan, who is a very enthusiastic angler, came up from Medicine Hat this week, meeting many old friends during his brief stay. His big regret was that the fishing season had not opened, but he played a few games of tennis. On Tuesday evening a few friends met at Bob Davidson's house for a social hour in honor of the visitor.

Weekly Sport Comment

Opposition to Importing Soccer Players Halts Local Club's Plans

The football executive has hit a snag in plans for building a championship team. Bill Knight, brought from Lethbridge a week ago, is still without employment after it being promised, and coming from a job in Lethbridge.

It is reported that bringing in athletes was freely discussed at the union meeting last Sunday. The view was taken by some that due to the number of local boys idle, they should be given the preference when work is available.

After promising Knight a job the local executive is "on the spot", and after this week-end's games with Miners and Harlequins, the team's future plans will be more clearly defined.

Junior Tennis Gains Interest—Tournament on Saturday.

Junior tennis players will be given an opportunity to test their ability on Saturday when the local club will sponsor a tournament. Already many entries have been received and the tournament's success is assured.

So keen is the interest of juniors that senior players have been cleaned out of their old racquets, regardless of the frames being dead or cracked. The youngsters will try their skill with anything that resembles a racquet.

WORLD HAPPENINGS BRIFFLY TOLD

Two naval airmen were killed when their plane crashed and sank in the Pacific ocean during the United States fleet's war games, naval officers reported.

The Girl Pat, Grimaby trawler whose adventures astonished the world last summer, has returned to Portsmouth from Georgetown, British Guiana.

William Spears, whose father was keeper of Flower Pot Island lighthouse in the Georgian bay for 25 years, has been named, keeper to succeed him.

United States Labor Secretary Frances Perkins said that legislation to fix "minimum working conditions" tops the Roosevelt administration's labor program.

Proclaimed the "most beautiful milkmaid in the world" at a Sabotea, Kas, farm fair, Miss Aloha Warner seeks no greater prize. She declined a stage offer and a possible opportunity because she is too busy delivering milk for her father's dairy.

A despatch to the New York Times records the death in Italy of Hugh de Trenchbroke Blackwood, 42, noted portrait painter. He lived in Toronto for a while as a young man, and one of his paintings, "Lady in Black," hangs in the national gallery in Ottawa.

An increase of nearly 10,000 passenger car licenses sold in the first four months this year against the figures for 1936 was believed a sound indication of rising prosperity in Alberta, license department officials said. Sales totalled 54,300 up till May 1, 1937.

Colonel Mario Pezzi of Italy bettered the world altitude for planes by flying to an indicated height of 15,655 metres (51,361 feet). His mark exceeded the record of Squadron Leader F. R. D. Swain, of the British Royal Air Force, listed at 15,223 metres (49,944 feet).

The University of Manitoba chemists are working out a preparation that will kill dandelions without injuring grass. They reported dandelions on Manitoba's legislative grounds lawns may be in for a short life this spring. The new method of killing them has not been revealed.

More Like Printing Press

Typewriter Used By Japanese Stenographer Has 3,500 Keys

Typists, whether they use the "hit and miss" system or are graduates of a special "pound the key" school, often feel that typing is one of the most strenuous jobs extant. But if they think they are overworked they should call on Kathleen Tsuchiya at the Japanese Chamber of Commerce in San Francisco. There she has a typewriter with 3,500 keys. That's what Kathleen works on when she is doing Japanese letters. She "hunts and pecks" over this number of separate ideographs of a Japanese typewriter to produce the string of hieroglyphics which make up a Japanese letter. An unnamed Oriental genius invented the machine and fitted 8,500 pieces of metal type into pigeon holes and devised an arm that lifts each one up and impresses it upon letter paper. The funny part about the story is that when it arrived from Japan, puzzled customs officers finally classified it as a printing press. There are six Japanese typists in San Francisco but California-born Miss Tsuchiya is the only one who writes both English and Japanese.—St. Thomas Times-Journal.

Romance Of Industry

Business In England Built Up From Small Start

The erection, at present taking place on a 4½-acre site, of a factory for dry-cleaning, dyeing, carpet beating and cleaning in Wolverhampton, England, forms a chapter in a romance of industry. The great Midlands town of England have long been famous for their self-made men, but on this occasion it is a self-made woman, Mrs. Marshall, who directs the business. The firm, which began sixteen years ago, with one shop, now has two factories (apart from the one being built) and 62 branch shops located in six Midlands counties.

Water Taken From Air

Water is taken from the air by huge, dome-shaped "air wells" which are being built in dry areas of Europe. The warm outdoor air enters the dome through the openings, and is robbed of its moisture by contact with the cold interior.

News by radio can't take the place of a newspaper. You can't hunt it up later to settle an argument.

Rights Have Been Maintained

Basques Have Been Described As Race Within A Race

The world is hearing much to-day of Spain's Basques. Who are they? Living in three northeast provinces of Spain, they are a race within a race. Mr. Lloyd George said the other day that the Basques were blood-brothers of the Welsh, but Mr. Lloyd George's forte isn't history, and the matter is by no means clear.

Up to the fifteenth century the Basques were for all practical purposes an independent people within Spain, speaking their own language, maintaining their own customs and traditions. When they did come under Spanish kings they maintained certain rights and privileges, and these, through all political upheavals since, have been more or less maintained.

A picturesque, lovable and brave people, the Basques are famous for the apples they grow, for the cider they make, also for their wines. Many of them engage in fishing, and some in mining, and the country is fairly rich in iron ores.

The Basques, contrary to a general impression, are not Communists. Almost overwhelmingly they are Catholics, in many ways the most Catholic people in Spain. But the Basques are Nationalists, are clearly skeptical of the legions of Hitler and Mussolini and the Moors of Franco in the guise of "Christian Crusaders."—Ottawa Journal.

The Significance Of History

Archbishop Of Canterbury Defends Use Of Coronation Rites

In an introduction to the order of service in the official Coronation program, the Archbishop of Canterbury takes to task persons who may ask, "are not all these ancient rites and ceremonies quite out of place in this modern world?"

The question, says the Archbishop, "surely gives singular lack of imagination—of that faculty which visualizes the significance of history."

"It is no mere paradox to say that the very merit and meaning of these rites is precisely that they are in a sense out of date. How could this wonderful stability and continuity of the national history be more impressively shown? But in another sense they are most truly—up to the common phrase—'up to date'."

"Consider the world around us—ancient empires and monarchies vanished, new dictatorships created, everywhere restlessness and uncertainty about the future. In the midst our King is to be crowned with the same rites as those with which his predecessors have been crowned for more than 1,000 years."

Britain Means Business

People Willing To Carry Heavy Tax Load For Rearmament

Anyone who doubts that Britain is in dead earnest about rearming has only to look at the tax load the British are willing to carry these days.

Before Neville Chamberlain, chancellor of the exchequer, brought in his new budget, with its higher rates, the British taxpayer was shelling 22½ per cent. of his income to the government in a direct tax. Beyond that he was carrying a load of "nuisance" taxes whose weight can be appraised by the size of those affecting motorists.

British motorists have been paying taxes of 16 cents on each gallon of gasoline. They also pay a horse-power tax on their autos, so set up that a man who owns a 25-horse-power car must pay \$125 a year for his license.

When a nation that is paying taxes at such rates submits to still heavier taxes for the sake of rearmament, it must be admitted that such a nation is decidedly in earnest about its preparedness program.—Kitchener Record.

A Healthy Pastime

Talking Birds The Lungs States Leading Specialist

Talking is one of the most health-giving pastimes. A leading French lung specialist points out that many human ills result from weakness or deterioration of the lungs. Intensive talking, he declares, strengthens these delicate organs. As women are supposed to love gossiping, he suggests that this may explain why there are many more widows in the world than widowers—talking makes the women live longer.

The University of Edinburgh was founded in 1582 through a charter granted by King James VI. of Scotland.

There are 1,024,000 persons by the name of Johnson in the United States.

The World's Wheat Field

Occupies Only About One Per Cent. Of The Total Land In The World

How large is the world's wheat field? The food research bureau of Stanford University gives some interesting statistics. The world has about 400,000,000 acres under wheat, which is about twice the acreage devoted to maize or to rice, the grains that come next in importance.

The world's wheat field occupies about one per cent. of the total land in the world, about six per cent. of the potential arable and pasture land, about 11 per cent. of all land suitable for wheat cultivation and about 17 per cent. of the arable land now being utilized.

While wheat is grown both north and south of the equator, about 90 per cent. of the world's wheat acreage lies in the northern hemisphere. Asia alone contains more than a third of the world's wheat acreage, Europe a little less than a third, North America less than a quarter.

The country with the largest wheat acreage is Russia, 78,400,000 acres. The British Empire has 12,300,000, Canada's share being under 30,000,000 acres. The United States has 65,300,000 acres, China 49,100,000 acres, the French Empire 22,400,000 acres and the Italian Empire 12,000,000 acres.

The Average Driver

Displays Certain Minor Failings When In A Hurry

The average motorist, according to a spokesman for the Harvard University bureau for street traffic research, has good intentions, is fairly skilful and is, on the whole, a safe driver. Then why are thousands on this continent dying in traffic accidents and hundreds of thousands of others being injured every year? The average driver who is, on the whole, a safe driver can not be exempt from responsibility.

The Harvard bureau spokesman places responsibility squarely upon that driver. He does get into accidents. Why? Not because he is unskilled or habitually reckless. He gets into accidents and becomes involved in slaughter because "he has certain minor failings which assume major importance when he is in a hurry." It is the duty of the average driver, therefore, to face his minor failings squarely and see to it that they do not become dominant in emergencies and make him responsible for manslaughter and serious property damage.—Gait reporter.

Evidently Not On Diet

Last Hawaiian King Was Served Heavy Coronation Dinner

The original menu for the coronation of Kalakaua, the last king of Hawaii, which has just been discovered, indicates he was not on a diet. The official dinner was in the Iolani Palace, now the territorial governor's office. The menu included three soups, six varieties of fish, in addition to crabs and lobsters, seven kinds of roasted meat, two curries, potatoes, peas, corn, spinach, seven wines, six desserts fruit, liquor and beer.

Just A Circular Room

A planetarium is a circular room over which is suspended a stainless steel dome serving as a screen upon which, by means of an intricate projector, it is possible to show in a realistic manner every star or other object in the sky that is visible to the naked eye.

Hiwatha, immortalized in Longfellow's poem, was a real Mohawk Indian.

Daimler is said to have built the first V-type engine in 1888.

Motion picture films made in Japan in the last year numbered 496.

OLVE YOUR "NEW FROCK" PROBLEM MAKE A DASHING SHIRTWAISTER

By Anne Adams

Want to look cool and crisp when the sun is shining just a shade too brightly? The answer to that question is Pattern 4413, your new frock that takes you everywhere and keeps you looking your best at all times. The tailored look that's a classic part of this popular style is ever so easily achieved even by "beginners" for this smart pattern is one of the simplest to cut and stitch!

Anne Adams knows that pretty striped sleeves, notched collar, are becoming to everyone and in good taste on sporting occasions. You've made choice of fabrics for this diverting frock among them vivid, printed percale, seersucker or crisp linen.

Pattern 4413 is available in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100. It is a simple to cut and stitch! Anne Adams knows that pretty striped sleeves, notched collar, are becoming to everyone and in good taste on sporting occasions. You've made choice of fabrics for this diverting frock among them vivid, printed percale, seersucker or crisp linen.

A Lucky Purchase

Diamonds Worth \$15,000 Found In Auction Room Bureau

The old bureau in the auction room was rather attractive. A woman at Geelong in Australia thought it would look well in one of her rooms, and so made a bid for it, buying it for \$35. When it reached her house she began dusting it, opening the drawers, and peeping in the cupboards. To her amazement she touched a secret spring, came upon a hidden drawer, and found a little bundle of sheep's wool. Inside were diamonds worth \$15,000.

More Polite Sign

In direct contrast to such blunt signs as "Keep Off the Grass," a psychological experiment undertaken by the park department appeared in Fort Tynk Park, New York. The experiment was in the form of a tastefully designed signpost which bore the following legend:

Let no one say, and say it to your shame, That all was beauty here, until you came.

The Shell-Mex House, London office building, contains 1,486 windows, 365 steel doors, 700 wooden doors and more than 20 miles of hot and cold water pipes. Its elevators can carry 10,000 persons in an hour.

RURAL QUEBEC

The above sketch is from the pen of Dr. Verrier Rondeau, dental surgeon of Rouleau, Sask. It depicts a rural scene common in the province of Quebec where the doctor spent his childhood.

SUNDAY SCHOOL LESSON

MAY 23

THE WEAKNESS OF ESAU

Golden text: Every man that striveth in the games exerciseth self-control in all things. 1. Corinthians 9:25. Lesson: Genesis 25:19-34; 26:34, 35; 27:1-46. Devotional reading: Hebrews 12:14-17.

Explanations And Comments

Esau and Jacob Contrasted, 25:27, 28. These twin sons of Isaac and Rebekah were wholly different in appearance and character. Esau, the first-born, was rough and hairy; he loved the outdoor life, and was a skilful hunter. He was the favorite of his father, who, as is often the case, preferred the son who was so unlike him in every way. Jacob was smooth-faced and handsome, a quiet stay-at-home, and he was the favorite of his mother. From these statements of parental favoritism one could foresee trouble.

Jacob's Craftiness, 25:29-31. One day Jacob boiled some pottage—a dish made of lentils or small beans which is still much liked in Syria—and when Esau came in from the field weary and faint, he asked Jacob for some of the pottage. Jacob, with that same red pottage," he cried.

Esau's Folly, 25:32-34. "I am tired to death," Esau said, "I am about to die." Esau gave utterance to the same feeling with the same amount of meaning: "Behold, I am about to die," he exclaimed, "and what profit shall the birthright do to me?" What did he care about something of use only in the distant future? All he cared for now was the satisfying of his present hunger.

Esau Discovers Jacob's Treachery, 27:30-40.

To Escape Death at Esau's Hands, Jacob Fled to Paddan-aram, 27:41, 28:5. Esau hated his brother for having secured his father's blessing, and said to himself, "The days of mourning for my father are at hand; then I will kill my brother Jacob." So Esau thought, and so Isaac thought, that the father's end was near at hand, but Isaac lived yet forty-three more years.

Helium Gas

Most Of The World's Supply Is Refused In Texas

Most of the world's helium supply is refused from natural gases at a United States government plant seven and one-half miles west of Amarillo, Texas.

Only slightly heavier than hydrogen, lightest of all chemical elements, helium penetrates gas bags far less rapidly than hydrogen. This, and the fact that it is non-explosive, makes it a prize sought after by many foreign governments, especially Germany, whose hydrogen-filled dirigible Hindenburg crashed in flames.

Helium was first discovered in 1868 when scientists noted it as a pale yellow band in the spectrum of the sun after a 27-year search. Helium was isolated from Texas gases, and to-day the Amarillo plant has a capacity of 20,000,000 cubic feet a year.

In 1918 the gas cost \$2,500 per cubic foot. Now it is being made for two-fifths of a cent a cubic foot. Other deposits of helium are found in Canada, which produces about 6,000,000 cubic feet annually, and in Kansas.

An Unusual Record

Italian Town Has No Births Or Deaths For Three Years

For three years there have been no deaths among the 400 people of San Gottardo, Italy, and several of the men and women are over 100 years old. I have almost forgotten how to rectify the funeral service," said the decrepit village priest to the visiting bishop. There also have been no births in San Gottardo in the three years.

If it were not for the sun's attractions, Jupiter would, because of its size, kidnap the other planets and add them to the flock of nine moons which already circle about it.

There are 7,407 miles of railways within the boundaries of Rumania.

Gardening

Several sowings of each vegetable are advised, otherwise all mature at the same time, and then there will be a feast of a famine. After all, with such things as radish, spinach, peas, corn or practically anything else for that matter, the time they are really worth eating is when they are fresh; that is, just mature.

Those who know all about the art of good gardening, tell us that when good, safe rule covering the seed to a depth equal to about three times the diameter is now the best rule not advised to procure a pair of callipers and work out the diameter of the seed. With large things like gladioli and dahlias or potatoes, this rule will call for depth of several inches. With pea, bean and corn it will mean about an inch.

Too much stress can hardly be laid on the necessity of thinning. After the plants come up, one is urged to stop and consider just how big these are going to be in a few weeks. It may be only six inches, in which case the plants should need only to be pulled. If they are eight inches, it is the common or the larger type of zinnias or marigolds that are being considered. These will reach from 18 inches to four feet in height. All such things require a room on all sides equally symmetrical and sturdy plants that will be both beautiful and storm resisting, are to be the result. Crowded plants will invariably be spindly and weak in the stem. Experts advise allowing about half as much space between as the plant will be high, whether it be vegetable, flower or shrub.

Mystery Of Stonehenge

Prevailing Theory Is Wrong According To A French Scientist

When Stone Age man and his wife in Britain went to worship at the famous place called Stonehenge, they may have had comfortable seats indoors. In other words, the great stone circle of ruins, now one of England's prize monuments, may once have been a covered temple.

Visiting the Stonehenge gaze up at the sixteen-foot stones that outline a great circle. They point out the inner circle and horseshoe of stones, and the altar-like arrangement of stones within. In their minds, they conjure up a picture of Stone Age Britons gathered there to outline a great circle, and to-day the Amarillo plant has a capacity of 20,000,000 cubic feet a year.

But that prevailing picture is wrong, according to a theory advanced by Prof. J. Vayson de Pradene of the University of Paris in the British archaeological journal Antiquity. The prehistoric builders constructed a roof and walls of massive beams and earthen plaster over the stonework shelter, he believes. To see what the building looks like, we have only to look at a North American Indian earth lodge, in the Great Plains region.—Victoria Times.

Recalls Old Mystery

Widow Of First Mate On Phantom Ship Is Dead

Mrs. Frances N. Richardson, 91, widow of the first mate on the "phantom ship" the Marie Celeste, whose crew vanished on the high seas in 1872, died recently in New York—the mystery of her husband's fate still unsolved.

As a bride, Mrs. Richardson stood down on the dock and waved goodbye to her husband, Albert, and the crew as the Marie Celeste sailed for Genoa from New York harbor with a cargo of alcohol in casks.

She never saw her husband again. The British bark, Del Gratia, found the Marie Celeste floating on the ocean off the Azores Dec. 4, 1873, nearly a month after she sailed—no man aboard.

The cargo was undisturbed, there were no signs of disorder, and food had been prepared for the next meal. The gold watch of the skipper, Capt. P. S. Briggs hung on its chain beside his empty berth.

Sound Travels Far

Dynamite Blast In Arctic Was Heard 7,600 Miles Away

City dwellers may think the world's biggest noise is the daily arrival of the milkman around sunrise, but it is recorded that the volcanic eruption of the Island of Krakatoa in 1883 was heard 1,400 miles away in Bangkok, Siam. A dynamite blast set off in the Arctic in 1933 was heard 2,000 miles distant, in Berlin. A peculiarity of the long-distance sound waves which carry such detonations is that closer to the explosion there are zones of silence in which the noise is not heard.—Christian Science Monitor.

Tuberculosis of the spine has been noted in human skeletons more than 10,000 years old.

Some parrots have been known to live for 60 years.

the warm-hearted friends, and the loyalty of our own comrades, I do not think I could have carried on, but God did reward our simple, but faithful, service, and while Coleman has had its day of testing since then, no one delights more than I in the good times you are now experiencing. I would urge you to re-dedicate yourselves to the flag and to the great principles for which the Army stands, leaving the embroideries of religion to others, keeping true to the main pattern—Salvation from all sin for all men through the blood of the Cross.

(Signed) THOS. H. MUNDY,
Major, Divisional Headquarters,
Nova Scotia.

The programs prepared by Lieut. Fitch were very appropriate, with a fine cover design emblematic of the anniversary and the Coronation, and containing a photo of the divisional commander, Major Acton. The events in connection with the anniversary will conclude with a young people's basket picnic at A. E. Knowles' ranch on Monday, May 24.

Mrs. Pinkney, ex. of Blairmore, was among the visitors at the supper served in the Army hall prior to the concert.

**STRIKING PUBLICITY METHODS
PAY GOOD DIVIDENDS**

Attractive posters in two and three colors were issued this week from The Journal office for the Canadian Legion carnival in Coleman on May 29 and 31, and for the Bellevue Victoria-May Day celebration on May 24. It pays to use outstanding posters to adequately advertise important events. The Coronation dance held in Coleman was the best ever held from point of attendance in recent years,

and striking posters in three colors were used to advertise it. These also were issued from this office.

**HIGH SCHOOL TRACK MEET
LIST OF WINNERS**

A. Class, Grades IX and X—
Girls 75 yards dash—Olwen Brown, Elsie Snider; girls' high jump—Elsie Snider, Viola Milley; running, broad jump—Elsie Snider, Olwen Brown.
Boys' 100 yards—Harry Thomas, Jack Goldring; boys' high jump—Harry Thomas, Fred Blazenko; running, broad jump—Jack Goldring, Fred Blazenko.

B. Class, Grades XI and XII
Girls' 75 yards—Rose Korolyk, Mary Snider; girls' high jump—Mary Snider, Isabel McDonald; running, broad jump—Isabel McDonald, Mary Snider.

Boys' 100 yards—Bob Emmerson, Tom Goldring; boys' high jump—Bob Emmerson, Fred Slugg; running, broad jump—Tom Goldring, Fred Slugg.

Half-mile race (open)—Emmerson, Goldring.

Slow bicycle race—F. Sharp, Dino DeMartin.

There is always some "scab" outfit which, ignoring fair prices and fair wages, quotes "scab" prices. They pay no taxes, grab all they can and spend their money elsewhere than where they get it. They are leeches on legitimate business, known among union men as "scabs".

Coronation Day

(Continued from Page 1)

ated to high and holy purpose. When none are for themselves, but all are for the state.

You remember the story of Moses in his war against the Amalekites. When Moses' hands were held aloft, the armies of Israel prevailed; when they were down, Amalek prevailed. How that the hands of Moses became heavy through responsibility, and Aaron and Hur held up his hands until the enemies of Israel were overthrown.

So it is today, only as each individual offers his life, his service, his allegiance, his love, to high purpose of God and to each other in the Commonwealth of Britain, can the leaders however devoted themselves, carry out the task to which they have been set apart?

Let us take our stand for God, for righteousness, for truth, for social and economic justice. Let us throw off all sloth, all selfishness, all indifference to the needs of others, all that is holding us back from the attainment of that abundant life which is the heritage of all.

Let us play our part as children of the King of Kings, in this part of the vineyard to which He has called us to work.

Let us accompany our King and Queen with bowed heads, with faithful hearts, with consecrated lives, and take our place by his side.

Address by Mr. Kellock

Following the religious service, Mr. George Kellock, general manager of International and McGillivray Coal Companies, based his address on the history and record of governmental and political evolution in Great Britain from the time when King John in 1215 was compelled by the barons and the bishops to assent to that famous document, Magna Charta, which demanded that the king relinquish rights and privileges which were inimical to the interests of the people. This charter, which was "discussed, agreed to and signed in a single day," a copy of which, though injured by age and fire, with the royal seal still hanging from the brown, shrivelled parchment, remains in the British Museum, is looked upon with reverence and is regarded as the basis of English liberty.

The rights which the barons claimed for themselves they claimed for the nation at large. The boon of free and unbought justice was a boon for all, but a special provision protected the right of the poor. The speaker reviewed the gradual development through the centuries of parliamentary representation of the people, referring to outstanding incidents leading up to the present day and the Coronation of the present King and Queen, and expressing the belief that changes in government and policies can only safely be brought about by constitutional methods.

He compared the conditions of prominent European powers, which today were governed by uncrowned kings, and the democratic form of government in Great Britain and the Dominion. The people of the Commonwealth of Nations were a freedom loving people who would not tolerate usurpation of their rights, and if permitted, changes were demanded by the masses of the people, the constitution permitted these changes to be brought about by constitutional methods.

Britain, through the centuries, had kings, some good and others not so good, but the people had used constitutional methods to depose or relieve from authority those they did not approve of. The Union Jack is the symbol of kings and the British system of government, and citizenship under that flag should be appreciated to a degree that has never been, in view of world developments.

Other nations might pull the British lion's tail, but if they as much as pulled a hair from it, then they would find that the might and power of Britain was no idle boast. Britain has always been generous to its foes, as instanced by the fact that in 1890-1892 the South African War was fought against the Boer Republic, following which generous terms were made, and in 1914 the people of that country were fighting side by side with the British forces. The king, the crown and the institutions they stood for were a sure safeguard of the rights and liberties of a democratic people.

NIGHT CALL FOR EDITOR

Dr. Keith MacLean and Dr. R. F. Stewart were in Edmonton last week taking a refresher course at the University of Alberta. The first the editor of this paper knew of it was on being awakened some time after midnight in the Macdonald hotel by an insistent knock. On answering the call, he heard a voice with a familiar ring enquiring if he knew anything about Social Credit, and what had he to say about it? Our thoughts by this time being somewhat stirred up, it was decided to go down to the next floor and see what it was all about. We immediately found out that the genial doctor was having a further session of their refresher course, and with some other friends joined in. Yes! A pleasant time was had by all.

Mrs. F. K. MacLean and son Jamie last week visited the former's parents at Canora, and Dr. MacLean, on his return from Edmonton, stopped off at Innisfail to visit his parents.

The Journal is always pleased to receive social and local news items for this column. Phone 209 or mail to Drawer E.

Doctor Kerr Presents Pins to Nurses

(Edmonton Bulletin)

"There is no degree given in Convocation which represents more hard work, where the strain is greater, physically, mentally or emotionally, than the nurses' degree." Thus spoke Dr. W. A. R. Kerr, president of the University of Alberta and member of the University Hospital Board, to members of the graduating class of the University Hospital at an informal "at home" in the Red Cross Hut on Thursday afternoon.

"Your life is a hard one—you live where you work and work where you live—you are, really, on duty, twenty-four hours a day," continued Dr. Kerr.

"Our congratulations, the best wishes of the board, of your hospital staff and of your friends are of the very deepest and most generous, on this, your graduation day," he concluded.

INFORMAL

Informality and gaiety was the keynote of the affair and throughout the spacious room were attractively

WILMA DOROTHY HALLIWELL, who was awarded the President's gold medal for general proficiency during her training period at University of Alberta hospital.

grouped chairs, clusters of spring-time flowers everywhere added charm to the scene, and the excited hum of conversation filled the room.

Distinguished guests present for the ceremony of presenting the nurses' pin to the graduates were His Honor Captain John Campbell Bowen, lieutenant governor of Alberta, and Mrs. Bowen, Dr. A. C. Rutherford, chancellor of the University, and Dr. and Mrs. W. A. R. Kerr.

Presentation of pins was made to the following, Dr. Kerr officiating: Miss Nora Connelly, Miss Gunn, Miss Phyllis Hoare, Miss Kathleen McCall Bell, Miss Wilma Dorothy Halliwell, Miss Doris Hutchison, Miss McQuarrie, Miss Doreen Speers, Miss Trott, Miss Gerwin, Miss Causgrande, Miss Oesberg, Miss Miller, Miss Kathleen Rennie, Miss Martinovsky.

PRIZES

Prizes to students attaining high marks during the year were awarded as follows:

President's Gold Medal—for general proficiency during three years' training—Miss Wilma Dorothy Halliwell.

Prizes awarded by the board of governors—University of Alberta: general proficiency in senior year—Miss Doreen Speers; highest standing in examinations in senior year—Miss Kathleen McCall Bell; highest standing in practical work in senior year—Miss Doreen Speers, Miss Wilma Halliwell, equal. Miss Speers and Miss Halliwell were equal also in their intermediate year.

Prize awarded by Dr. Rankin for highest standing in obstetrical work—Miss Kathleen McCall Bell (by reversion from Miss Doreen Speers). Dr. Pope's prize for highest standing in the intermediate year—Miss Kathleen McCall.

Tea was served following the ceremony and members of the class assisted in the passing of tea.

Julia Ondrus Awarded Gold Medal

Congratulations to Julia Ondrus, a former high school pupil, who was awarded the gold medal for general proficiency as a nurse-in-training at Holy Cross hospital, Calgary. She was also awarded a medal for highest rating in theory.

Have you bought your tickets for the major prizes at the Canadian Legion Carnival?

Local News

Mr. John Cross, president of Calgary Brewing Co., and Mr. Gilroy, called on the local hotel men on Monday.

The following from Coleman attended the musical festival at Lethbridge: Florence McDonald, Pete Bakaj, Rudolph D'Amico, Umie Johnson, Freda Antrobus, Gordon Roper and Mary Fredrickson.

Michel is the first team in the Crow football league to cancel a league game. They are still undecided whether or not they are going to enter the league after their delegates had them included in the schedule.

Bill Knight, recent member of Lethbridge Harlequins, was employed at International mine today. Norman Evans, of Bellevue, has also been signed by the Rangers. Both players will line up against Lethbridge teams this weekend.

Wm. Cousins was painfully injured Wednesday afternoon when a piece of cap-rock fell, hitting him on the left shoulder and arm, fracturing the arm in two places. Mr. Cousins had just recently recovered from a knee injury suffered during the winter and which kept him from work for a considerable time.

Drink Had Real Kick

Recently a meeting was held in a nearby town at which members of the clergy and others were present. At its close, one gentleman who desired to show a little hospitality to those present, invited them to his home, and produced the line of refreshments

REMINGTON PORTABLE
TYPEWRITERS
\$45.00

A portable typewriter is a very useful machine for the home or office. For teachers it is of value in making neatly typed reports, filling in forms and personal work.

usual on such occasions. The gentlemen of the cloth declined to take anything containing intoxicants, so the host hunted around the kitchen cupboard, his wife being absent, to find something more suitable. Spying a bottle with the label—Montserrat Lime Juice, drinks were poured from it for the totaliters. One gentleman after mixing a little sugar in his lime juice, noticing it bubbling, remarked it was the first time lime juice he knew of had bubbled. His host, claiming to be an authority on lime juice and all other drinks, assured him it was alright. Those who were served with this harmless drink raised their glasses—when—lo, there was a general spluttering and a seeking of means to escape anywhere to get rid of their drinks. It turned out to be turpentine which the lady of the house had placed in the bottle. On being informed on her return of what had happened, she told her husband he had better replace the turpentine.
